

MicroRevive

MICROBIAL SOIL INOCULANT

Activate life. Restore balance.
Grow better.

MicroRevive is a premium biological soil inoculant powered by a diverse consortium of beneficial microorganisms. Designed to activate soil biology, unlock nutrients, support root development, and improve water efficiency—naturally.

POWERED BY
BIOLOGY.
DRIVEN BY
PURPOSE.

STRONGER ROOTS

Supports deeper root development and plant vigor.

BETTER NUTRIENT CYCLING

Unlocks nutrients and supports natural soil fertility.

WATER EFFICIENCY

Improves soil's ability to hold water and reduce water use.

HEALTHIER SOIL

Builds resilient, biologically active soil systems.

REDUCE DEPENDENCY

Reduce reliance on synthetic inputs over time.

IDEAL FOR

LAWNS

GARDENS

TREES & SHRUBS

CONTAINERS & HOUSEPLANTS

SMALL FARMS & HOMESTEADS

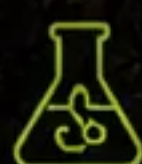

TURF & LANDSCAPES

REAL RESULTS YOU CAN SEE

- ✓ Yield Improvements: 10–50%*
- ✓ Fertilizer Reduction: 15–40%*
- ✓ Chemical Pesticide & Fungicide Reduction: 20–40%*
- ✓ Water Use Reduction: 30–50%*
- ✓ Visible Biological Response: Typically within 2–8 weeks

*Results vary based on soil conditions, management practices, and environmental factors. Not a fertilizer.
